Randel Angelo Yumul

Pampanga, PH • randel.angelo10@gmail.com • +639690691662

EDUCATION

Bachelor of Science in Computer Science Angeles City, PH
Holy Angel University
Expected Graduation: April 2027

- President's Lister for academic excellence
- Academic Scholarship recipient

PROJECTS

Shifted Remote
Game Developer May 2026

- Engineered core gameplay systems in Godot 4, including a fast-paced collection minigame with custom ingredient and obstacle spawning mechanics.
- Implemented dynamic environmental and audio systems using CanvasModulate, randomized lighting effects, a Global BGM Autoload, and signal-based architecture to create reactive gameplay experiences.

ALVIN: AI-Driven Disaster Response Platform Angeles City, PH
Frontend Developer Dec 2025

- Achieved 1st Runner-Up at the Cloudstaff AI Hackathon 2025 by developing ALVIN (Assist, Locate, Verify, Inform, Navigate), an AI-powered disaster response platform for community preparedness and emergency assistance.
- Implemented the full-stack web interface using Next.js, Tailwind CSS, and Leaflet, integrating the user experience with AI workflows powered by n8n and Dify.
- Developed features for real-time monitoring of typhoons, earthquakes, and evacuation centers, including navigation, emergency hotlines, SOS functionality, and AI-generated context-aware safety recommendations.
- Contributed to hazard assessment features that generate flood and landslide risk information based on user-selected map locations and supported offline emergency communication through system-initiated SMS.

AldawWave: Data-Driven Commute Recommender Quezon City, PH
Frontend Developer Sep 2025 – Nov 2025

- Directed a team to a Top 10 finish among 40 nationwide competitors by developing a web application that mitigates commuter heat stress.
- Collaborated with the development team to design a predictive model utilizing historical PAGASA data, integrating OpenMeteo and Google Maps APIs to calculate optimal departure times.
- Contributed to the implementation of the Google Gemini API, which generates personalized travel recommendations based on real-time heat index forecasts and crowd density indicators.

FundBuddy: AI-Driven Financial Reporting Angeles City, PH
Mobile Application Developer Oct 2025

- Developed a cross-platform mobile application utilizing Flutter and Supabase to streamline liquidation and reporting processes for over 60 student organizations.
- Designed system logic strictly adhering to Commission on Financial Audit - Holy Angel University (CFA-HAU) guidelines to ensure financial transparency and accountability.
- Integrated the Gemini API to automate receipt scanning and data extraction, significantly reducing manual data entry errors for finance officers.

LEADERSHIP & ACTIVITIES

External Vice President Angeles City, PH
League of Outstanding Programmers (LOOP) Jun 2024 – Jun 2025

- Supported organizational activities, external coordination, and student-led initiatives.
- Collaborated with officers and members in planning and implementing computing-related activities.
